EDUCATION

Clark University <i>Master of Science in Data Analytics</i> Relevant Courses: Data Management of Information Technology, Python of Data Analytics, Data Visualization and Storytelling, Fundamentals of Data Engineering, Healthcare Tech foundations.	Worcester, MA Jan 2026 – Present
K.S. Institute of Technology <i>Bachelor of Engineering, Computer Science & Engineering</i> Relevant Courses: Application Development Using Python, Data Management Systems, Artificial intelligence and Machine Learning, Big Data Analytics, Cryptography.	Bengaluru, IN Jun 2019 – Jun 2024

WORK EXPERIENCE

Python Full Stack Developer Trainee Engineer <i>Palle Technologies</i> <i>Bengaluru, IN</i> - Assisted in full-stack development using Python and Django, focusing on backend development and seamless data integration. - Designed interactive, responsive web pages with HTML and CSS, adhering to responsive design principles.	Dec 2023 – Jun 2024
Junior Data Analyst Intern <i>Rapsol Technologies Pvt Ltd</i> <i>Bengaluru, IN</i> - Analyzed datasets using SQL and Excel to derive actionable insights, streamlining decision-making processes. - Enhanced reporting and visualization methods, leading to increased efficiency in analytics tasks.	Jun 2023 – Nov 2023
Full Stack Web Developer Intern <i>Varcons Technologies Pvt Ltd</i> <i>Bengaluru, IN</i> - Developed and maintained user-friendly web applications, focusing on frontend and backend components. - Collaborated with cross-functional teams to design intuitive web solutions, improving overall functionality and user experience.	Aug 2022 – Sep 2022

TECHNICAL SKILLS

- Programming Languages:** Python, R, MATLAB, SQL, PLSQL, MySQL, C, C++
- Data Tools:** Tableau, Power BI, Microsoft Excel, Microsoft SQL Server, Pandas, NumPy, Scikit-learn, OpenEMR
- Web Technologies:** HTML, CSS, JavaScript, Django
- Frameworks and Libraries:** TensorFlow, Matplotlib, SVM, GGPlot, Seaborn
- Certifications:** Tata-Data Visualizations (Feb-2026), Deloitte Australia- Data analytics (Feb-2026), British Airways- Data Science (March-2026).

DATA ANALYTICS PROJECTS

- | | |
|--|-------------|
| Realife manufacturing (Manufacturing dataset) <ul style="list-style-type: none">Analyzed NDA-restricted manufacturing data for bottle and candle label production, incorporating machine performance, production volume, and operator activity to improve production quality.Identified quality trends and machine efficiency issues through data-driven insights. | Fall 2025 |
| Database project (Venmo dataset) <ul style="list-style-type: none">Designed and managed a database with hundreds of data points to analyze customer purchase preferences using Microsoft SQL Server Management Studio.Executed advanced queries (subqueries, GROUP BY, JOIN) and visualized data relationships with ER diagrams. | Fall 2024 |
| Zero-bit Watermarking Method for Biometric Data Security <ul style="list-style-type: none">Developed a watermarking method to ensure biometric data security without compromising data integrity. | Spring 2023 |

KEY COMPETENCIES

Analytical Expertise, Problem Solving, Team Collaboration, Strong Verbal and Written Communication.
